Professor Joshua Lederberg
Department of Genetics
Stanford University
Palo Alto, Calif.
USA

Dear Joshua:

I am glad to be able to inform you that the Cancer Society has now granted Eva and myself economy class round trip fares between Stockholm and San Francisco. We now hope that everything will work out according to the plans. I have seen the American consul here and he said that I must ask you to start a petition for the visa of the whole family. I have a temporary visitor's visa which is valid but this is not good for this particular purpose since we shall be working. Temporary employment is the correct visa form, as you suggested. We cannot do anything until the consul gets the papers which have to be started by you and sent to the immigration authorities and from them to the consul here. Please do let me know what we can do in the way of filling out forms etc., in order to give you the least possible trouble. He also advised us to apply for the visa of the maid here whenever our visa comes through, as our own employee. She will definitely come back with us.

Any news about epinucleic terminology?

I trust we have been able to please you this year too?

With warmest greetings,

As ever,

George Klein
